

Crop Steering Water Content

Field Capacity

Each substrate varies by brand, density, age, conditioning, EC, and temperature, the “standard” moisture field capacity is a range 55–65%

Set the FC WC=60% in Growlink

Dry Backs

- **Vegetative** steering days: smaller dry backs, mid-day WC ~45–55% - **WC 52%**
- **Generative** steering days: larger dry backs, mid-day WC ~35–45% - **WC 42%**

	P1 Dry Back VWC %	P1 Actual VWC%	P2 Dry Back VWC %	P2 Actual VWC%
Vegetative	10-15 = 12%	60 – 12% = 53%	4-7= 6%	60 – 6% = 56%
Generative	20-30 = 25%	60 – 25% = 45%	8-12 = 10%	60 – 10% = 54%
