

## Harvest

### Preparation:

- Ensure the Dry Room is clean, sanitised and environment settings are correct.
- In flower room, turn off grow lights and irrigation valves before harvest

### Harvesting

- Handle plants gently to avoid trichome damage, which affects product quality.
- Cut plants at the lowest stalks and place on mobile racks
- Check harvested material for signs of mold, pests, or other quality issues. If found notify Team Lead immediately.

### Mobile Dry Racks

- Hang whole plants upside down on racks, evenly spaced for air flow
- Ensure each rack contains one cultivar only
