

Transition to Flowering

Day 1 of Flowering

1. Rockwool Setup

- Place **rockwool slabs** on benches.
- Transfer **cubes with clones** onto the slabs.
- Ensure **drippers are pushed into the slabs** and slab plastic remains **outside the cube**.
- Keep all **dripper lines on the same side** of the slab for consistency and tidy layout.

2. System Setup

- Set the **Active Crop Start Date** in the control system.
- Adjust **environmental controls** to flowering parameters.

Defoliation

- Complete defoliation according to the **Defoliation SOP – Day 1 Flower Stage**.
